# CHEESE

## **Milchmanufaktur Einsiedeln**

---

At Milchmanufaktur Einsiedeln, local mountain milk is processed into first-class dairy and cheese products. A centuries-old tradition that has been passed down from generation to generation. This is sustainability in action!

Grass that grows on the herb-rich mountain meadows around Einsiedeln, is refined into milk by the local Braunvieh breed and can thus enter our food cycle. The transport routes are no longer than the farmers' children's way to school. Delicious products are made from Einsiedler mountain milk in the milk factory with a lot of manual work and attention to detail. Natural ingredients are used, and no artificial preservatives are used.

## **Käserei Jumi Bern**

---

The Jumi dairy farmers are all based around the cheese dairy in Emmental, Bern. Their cows pluck grass in the pasture in summer. When the cold months pass and the white splendour covers the land, the ruminants get hay. The cows are milked twice a day, after which the animal-warm fresh milk is taken to the cheese dairy for further processing.

Raw milk cheese can only be made from pure, clean milk from healthy cows. The milk is not boiled before cheese-making. Only raw milk cheese can be stored longer in the cellar and thus develop its natural aroma.

## **Sélection Maître-Affineur Duttweiler**

---

The Maître Affineur Duttweiler is a very small affineur at the back of Lake Geneva. He buys his cheeses from selected producers and then refines them according to his own recipe, following a long-standing tradition.

His highly exclusive products are known throughout Switzerland and have an extremely exclusive taste.

## **Affineur Mauerhofer**

---

Affineur Mauerhofer is one of the oldest cheese trading companies in Switzerland. In Burgdorf, the cheese specialities mature in historic sandstone cellars. The aim of Affineur is to preserve the historical craft and cheese tradition of Switzerland. They stand for natural products, the highest taste and the greatest possible animal welfare.

Thanks to careful care (affinage), the cheese innovations mature in peace over many months in centuries-old, naturally tempered cellars. Nature determines how many cheeses may be produced.

Dear guests,

The cheeses marked with "&" are affinated cheeses which have already been carefully selected in their raw state as a top product by one of our master affineurs and later matured to perfection by the same in the old art of craftsmanship. Please understand that some varieties are not available due to seasonal factors and that we only want to offer those that are available to us at the perfect degree of ripeness at the time.
